

Wall to Wall Cable Display

USER INSTRUCTIONS

Fitting Instructions

Make sure the fixings are strong enough to allow tensioning of the cables. Screws supplied are suitable for wooden walls, for cavity and solid walls use the appropriate rawlplugs.

A) Fix fitting 1 to wall

B) Use a plumb line to mark the centre position of the floor lower wall fitting 5

C) Use a plumb line to mark the centre position of the floor fitting 5

D) Separate section 3 and 4 and connect to the wall fittings

E) Adjust the length of cable by loosening the grub screws at point A. Adjust to correct length, cut off excess cable then tighten grub screws

F) Adjust the tension by screwing 3 into 4. Do not over tighten

Distance between cable centres

The distance between cables depends on the literature or poster holders you are adding. To calculate width required add 45mm to the width of the holder.

EG

A4 poster holder is 210mm wide + 45mm = 255mm

The cable centres need to be 255mm apart

A4 cable centres 255mm apart

A3 cable centres 342mm apart

A2 cable centres 465mm apart

A1 cable centres 639mm apart

A0 cable centres 886mm apart
